Hi Peter,

Thank you for the opportunity to put myself forward for Head of Hardware and Partnerships. “Customers go live on the date we promised” is the line in the posting I recognised most.

My first job was hardware that had to work on arrival. At Nine Network I designed, built and supported **~20 flyaway broadcast kits** that went live within **2-3 minutes of landing**, in disaster and conflict zones on every continent.

I was also the sole design and delivery lead for the **Beijing 2008 Olympics**, a date nobody was going to move.

Then two years at a systems integrator, specifying/procuring equipment and delivering it on customer sites.

In terms of partnerships and commercials - the closest thing to your brief is probably BinaryTech. An Australian IoT device company had no European channel. I signed **Roche Diagnostics** as the distribution partner and expanded it into an **exclusive global reseller agreement**, seven figures over a three-year minimum.

I held firm on exclusivity and the minimum through Roche’s legal and compliance process. The channel then produced **NHS** sales and a ten-year contract with **OLVG**.

As VP Asia at Brightcove I led **20+ people** over Singapore, Mumbai and New Delhi and grew the region from **~$4M to ~$11.5M ARR**.

To be clear - I have not run a POS or kiosk fleet, and I have not owned customs or Incoterms for a European distribution operation. I think an engineer who has stood up field hardware against a deadline gets to grips with those quickly, with Delivery and Finance as the sounding board.

I work fully remote from Valencia, inside the EU. I also build my own tooling (AI agents, CRM automation, dashboards), which helps when the demand forecast has to come out of the sales pipeline.

Happy to hop on a call to talk through how you see the function in its first year.

Thanks Peter,
Ben Morrell
