CUSTOM BUILD · NO TEMPLATES

Small websites, built properly.

Fast, findable websites for independent businesses. Designed and built from scratch for you, never from a template, then looked after by the person who built them.

Fixed prices

Three clear packages, every one a custom build. You know the cost before anything starts.

Easy to find

Set up for Google and AI search from day one, with Search Console verified.

Looked after

Hosted on fast, reliable, industry-standard platforms, kept secure, with help when you need a change.

How it works

1. **Tell me about your business.** A short online questionnaire, about 10 minutes.
2. **Get a fixed quote.** A package recommendation and a simple contract to agree online.
3. **Pay a 50% deposit.** I set up your site and share a private preview link.
4. **Shape it together.** Review the preview and tell me what to change.
5. **Go live.** I connect your domain, check everything, and look after it from then on.

About me

I'm Ben Morrell, a web developer based in Spain. I design and build every site from scratch, with no templates, on fast, reliable, industry-standard hosting. You deal with one person from the first message to go-live and beyond.

Questions

Do I own my website?
Yes. Your content and site design are yours once paid in full, and your domain is always in your name.

What do I need to provide?
Your photos, logo and notes about your business. I write basic copy for you to review and edit. No logo yet? Add a logo, branding or stock photos.

Can I update it myself?
On Tier 2, yes, with a simple editor. On the Care plan, I make small changes for you every month.

Ready to start?

Answer a few questions and I'll come back with a fixed quote.
