Hello Luc,

Thank you for the opportunity to put forward an application for the Director of International Business Development & Sales seat. I have read the posting properly, so here is the written case, with the two gaps named up front.

The channel half of the role is the part of the job I have done most, twice.

For a small IoT vendor with no EU channel I ran the outreach to Roche Diagnostics and negotiated an exclusive global reseller agreement, seven figures on a three-year minimum, with an \$80B counterparty. It stalled in their legal and compliance process and got signed because I kept the commercial sponsors visible. That channel then produced the NHS sales and a ten-year contract with OLVG in the Netherlands.

At scale, at Brightcove, I recruited **15+ ISV and agency partners** across Asia and ran the global partner programme regionally: onboarding, enablement, tiers and performance reviews. The channel grew to **35% of regional pipeline** whilst the region went from ~\$4M to ~\$11.5M ARR, on a monthly forecast to the global CRO.

Market entry is the other half. For Encoding.com I wrote the APAC market-entry thesis, ran a four-country executive roadshow (Singapore/India/Malaysia/Thailand) and grew qualified pipeline 1200%. At Brightcove I opened Vietnam, Taiwan, Thailand and the Philippines with local partners and formally opened the India office.

To be clear - I have not sold Earth observation data and I have not run a government capture function. What I have is bid management from Grass Valley and 18 years of qualifying deals on a forecast.

I also have an engineering habit. I build AI research agents that crawl public sources and score what they find, so the tender and funding-programme monitoring in the posting is something I would probably build in the first quarter rather than buy.

Why Hydrosat - I live in Valencia, in one of Europe's most water-stressed farming regions, and I saw the 2024 DANA floods first-hand. Water and crop intelligence from orbit is the kind of problem I want to spend the next decade on.

In terms of the practical side - fully remote from Valencia, happy to travel internationally, engaged through a non-Spanish entity (Luxembourg works well), Spanish at an intermediate level.

So - happy to hop on a call to talk through where the international channel should start. CV attached.

Thanks Luc,
Ben Morrell
