Dear Oyster hiring team,

I spent eighteen years running the five functions this role points at, and I now build the systems myself.

In terms of the commercial half: I owned the Asia region at Brightcove across sales, partnerships, solutions engineering and customer success, and grew it from **~$4M to ~$11.5M ARR** at **120%+** of quota with a **20+ person team**. When a GTM leader tells me what is slow in their week, I have usually been the person it was slow for.

The closest match to this role is Livepeer. They had early traction and no repeatable commercial motion, and I led global GTM.

I stood up forecasting, a deal and contracting cadence, documentation and team training, with the CRM as the single frame of reference. That work signed Tier-1 partnerships including **Aptos at $500K**. Firstly - the shape of it is the point. I redesigned how the commercial org operated rather than automating tasks inside it. I think that is the distinction your posting draws.

Since 2024 the building has been hands-on and in production. I authored a remote **MCP server** exposing a shared business-context layer to Claude chat and Claude Code, with eight tools, Bearer auth and conflict-checked atomic writes.

I have also built **AI agents** for vendor due diligence that fan out across Companies House, the FCA and news sources via Playwright. And an AI GTM platform on the Claude API, with Stripe billing, 2FA and an open-source CRM integration. I write the orchestration rather than configure it, which I would argue is the more useful end of “comparable orchestration technologies”.

To be clear on what I would want tested: my hands-on AI work runs to about two years. The automation, systems-integration and revenue-operations half behind it runs a good deal longer.

On the judgement your posting asks for, about where AI is not the answer. Having advised twenty-odd founders, the failure I see most is a workflow automated before anyone asked whether it should exist. I am keen to work somewhere that puts that in the job description.

I am in Valencia on CET and have worked fully remotely since 2019, including four years running a company whilst sailing 6,000 nautical miles with two young kids.

Happy to hop on a call to talk through any of the above.

Thanks,
Ben Morrell
