Dear Hiring Team,

At Brightcove I built a partner ecosystem from nothing: 15+ ISV and agency partners that grew to drive 35% of regional pipeline across 15+ countries. Building and owning a global partner ecosystem is the work I do best, and Linnworks' Global Partnerships Director role is exactly the charter I want next.

I have built partnerships functions from scratch and scaled them into revenue engines. At Watchdog I stood up the partnerships function and signed a partner the company had chased for three to four years, plus several more across Europe, the US and APAC. Through revenuesystem I secured an exclusive global reseller agreement through the Roche Diagnostics channel, a seven-figure, three-year deal that drove NHS sales and a ten-year contract in the Netherlands. Turning a target marketplace or platform into a signed, revenue-producing partnership, then building the program around it, is a motion I have run repeatedly.

I have also led the distributed, multi-regional teams this role manages. At Brightcove I built and ran a 20+ person team spanning sales, partnerships, solutions and customer success, with under 10% annual turnover and 80% of promotions grown internally, all while carrying a partner-influenced number and reporting pipeline contribution to the executive team. Marketplaces and platforms are the ecosystem I've spent my career inside; ecommerce sellers are a set of stakeholders I've advised and sold to, and I'd close the retail-tech network gap fast.

I'd welcome the chance to talk about how I'd build Linnworks' global partner ecosystem. I've run a business across borders and time zones, literally from a 40-foot boat: remote and self-directed is simply how I work.

Best regards,
Ben Morrell
