Dear Hiring Team,

I have already built a go-to-market motion through Roche Diagnostics, from the outside. I am applying for the GTM Lead (Digital Infrastructure) role to do it from the inside.

Over the past three years, working with the medical IoT company BinaryTech, I opened the European market for its BinaryMed platform and closed an exclusive global agreement to resell it through the Roche Diagnostics channel: a 7-figure deal with 3-year minimum terms, signed with Roche Diagnostics HQ. That partnership drove multiple NHS sales and a 10-year agreement with OLVG in the Netherlands. Building it took direct work with more than 30 Roche employees across commercial, product, and affiliate teams. So I already know how a technical product becomes commercially real inside Roche's matrix: what an affiliate actually needs before it will carry something, and what commercial readiness has to mean before a launch sticks.

As I read it, that is what this role asks for: translate platform and digital infrastructure value into market success through affiliates. I have run that motion at scale. As VP Asia at Brightcove I grew the region from ~\$4M to ~\$11.5M ARR by enabling a distributed seller network across 15+ countries. I recruited 15+ partners whose channel drove 35% of regional pipeline, and got the commercial teams in each market to position and sell a complex technical platform consistently.

I am also genuinely technical: an MEng, a Senior Solutions Engineer to VP progression, and a current hands-on AI practice where I ship my own agents and MCP servers. Inside a Product Core Team I can hold the roadmap conversation as well as the revenue one.

I would welcome the chance to discuss how this maps to the Platforms and Digital Infrastructure portfolio. I am based in Valencia and available at your convenience.

Best regards,
Ben Morrell
